

## Environmental policy of PureAqua Llc.

The basic philosophy of the management of PureAqua Llc. is to support solutions in connection with the global environmental problems and with the improvement of the local and natural environment by taking the sustainable development and environmentally conscious behavior into consideration.

We have established our environmental management system with regards to these views according to the MSZ EN ISO 14001:2004.

Our main aims are:

- to offer the most complex service available in the field of water and wastewater treatment, with the slightest environmental impact and minimalized environmental risk,
- to fulfil our duty according to the requirements and provisions of the law, professional standards and the best available techniques.

In order to reach these goals, our enterprise:

- makes operative and strategic decisions by taking the environmental aspects into account,
- treats his own environmental, economic and social cases together by taking the sustainable development into consideration,
- pays special attention to the proper handling of the generated hazardous and non-hazardous waste,
- provides regular opportunity of studying for the workers to develop their competences,
- keeps contact with authorities, and pays attention to the European and domestic legislative changes,
- provides the compliance to the European standards and regulations with the introduction of the selective waste collection and its propagation,
- last but not least contributes to the improvement of our environment, the quality of our water bodies and the protection of human health by his mission.

Besides the environmental conscious behavior, PureAqua Llc. also pays attention to his partners' and clients' environmental attitude.
